

Shreesha B Koujalagi

Age: 22, Male

EDUCATIONAL QUALIFICATION

B.E Computer Science Engineering	SMVITM, Udupi	2026	Ongoing
Diploma in Mechanical Engineering	KLE Society's C I Munavalli Polytechnic, Hubballi	2022	60.4%
Class 10 (SSC)	Kendriya Vidyalaya No. 2 Hubballi	2019	55.8%

INTERNSHIP

Intern Spherenex Innovation labs	Cyber Security Intern
---	---

KEY PROJECT

MARG YATRI- Travel & Tourism Web app	- Built a modern travel companion app designed to simplify how users discover destinations and organize their trips in one place. - Leveraged React and Tailwind CSS to create a sleek, user-friendly interface that prioritizes a smooth browsing experience. - Developed a secure backend using Flask to handle user accounts and personalized travel data, ensuring a reliable and safe environment for travellers. - Deployment link:- https://margyatri.vercel.app/login
MedScan Forensics- Medical image forgery detection platform	- Addressed the critical issue of medical record integrity by developing a system to detect forgeries and unauthorized alterations in digital medical scans (X-rays/MRIs). - Designed and developed an AI-powered platform to detect and localize splicing, retouching, and object removal forgeries in medical images. - Implemented deep learning models (CNN & UNet MobileNet , ResNet50) for tampering classification and segmentation, and built a React-based dark-themed frontend for image upload, result visualization, and forgery. - Deployment link:- https://medscan-pink.vercel.app/
Freakzoo	- Created a dual-platform social space designed specifically for creators to showcase their portfolios and connect through both web and mobile apps. - This platform is mainly focused on the upcoming and currently active generations that what all the requirements are needed in an social media platform - Developed a high-performance web app using Next.js and a native mobile app using React Native , keeping the experience smooth and consistent across all screens. - Focused on high-end interaction, using Tailwind CSS and Framer Motion to build "Neon" themed interfaces, interactive mood boards, and fluid animations. - Integrated real-time messaging with voice notes and added a unique security twist by implementing simulated anti-screenshot features to protect creator content. - Deployment link:- https://freak-zoo.vercel.app/
LAYAKAR	- A music platform web application where the main focus is to up bring the underrated starts and artist where they can explore them self for their career growth - A feature of analyzing the type of audio and you will get the information about it,listen music create music and explore music . tech used React, python, css, html and javascript - Built a specialized platform to bridge the gap between traditional music learning and modern technology

GOOfast	- Built a high-performance, 60-FPS arcade racing game from scratch, focusing on raw physics and fluid movement without using external game engines. - Developed a custom 2D physics system using HTML5 Canvas, featuring momentum-based acceleration and sub-pixel collision detection for a precise "retro" feel. - Synthesized original 8-bit sound effects directly in the browser using the Web Audio API and designed a sleek, "Neon-Cyberpunk" UI with CSS. - Deployment link :- https://goofast.vercel.app/
Digital Signature using RSA	- An experiment to check how RSA key works and how the encryption of the message is done by using RSA algorithm - Developed an interactive, web-based simulation environment specifically for exploring Cryptography and Network Security principles. - Built a secure authentication system allowing users to register and maintain individual "Lab" accounts to track their progress and experiments. - Designed a clean, focused interface using modern web standards to simplify complex technical workflows for students and security enthusiasts. - Deployment link :- https://skcreations.vercel.app/login

POSITION AND RESPONSIBILITIES

Led a team through field visits to identify community challenges and develop innovative, tech-driven solutions. Coordinated project workflows and stakeholder interviews to translate research into actionable social impact plans. Managed event originations for a large-scale student celebration, ensuring a seamless and high-energy experience. Technical Mentorship: Conducted interactive sessions for school students, simplifying IoT (Internet of Things) concepts and hardware architecture into digestible lessons. Guidance: Provided personalized career and study roadmaps, encouraging students to explore emerging technologies and STEM-related fields.

CERTIFICATIONS & COURSES

Programming in C	Codechef
Innovation with Field Visit	COMEDKares
Digital Marketing	GTTC
Programming in Python	BALC
Design Intern	Lathe Cutting Operations
Android and Web Development	Golden Bird Education
Data analytics and AI	Rooman Technology Pvt Ltd (Undergoing)

PERSONAL INFORMATION

Languages	English, Hindi, Kannada Domicile: Kannada
Hobbies	Singing, Shayari(Poetry), Table Tennis, Reading, Geopolitics ,Football , Swimming .
