Academic Projects

WonderBuddy – Travel & Tourism Web App

Built a responsive travel and booking platform using React and Tailwind CSS, enabling users to discover destinations, book trips, and access personalized recommendations.

MedScan Forensics – Medical Image Forgery Detection Platform

Designed and developed an AI-powered platform to detect and localize splicing, retouching, copy-move, and object-removal forgeries in medical images. Implemented deep learning models (CNN & UNet) for tampering classification and segmentation, and built a React-based dark-themed frontend for image upload, result visualization, and forgery

Car Fuel Collector – Python Game

Developed an interactive 2D car game using Python and Pygame where players drive a car to collect fuel while avoiding obstacles. Implemented real-time scoring, animations, and game-over logic when fuel is missed, creating an engaging arcade-style experience.
